

3rd Regional Workshop on Sustainable Transport Indicators

Wednesday, 29 March 2017

Jamjuree 1, M Floor, Pathumwan Princess Hotel, Bangkok, Thailand

Background With the second largest vehicle fleet in Asia just after China, member countries of the Association of Southeast Asian Nations (ASEAN) already face serious problems including congestion, fossil fuel consumption linked with CO₂ emissions, air pollution, and road safety. In many developing countries, the information made available on the impact of transport policies and projects on emissions is insufficient and potentially misleading, as the necessary data for indicators is missing. Further, the majority of ASEAN countries have not yet defined or are still in the process of defining sustainability goals within the transport sector, and hence require support in terms of improving indicator and data availability.

The recent Kuala Lumpur Transport Strategy Plan 2016-2025 (KLTSP) has reinforced the need for “the development of the monitoring framework and harmonised approach for indicators on energy and GHG emission in the transport sector”. In order to develop this monitoring mechanism, consultations need to be carried out to gain support from diverse public and private stakeholders and improve awareness.

Scope and Objectives The third regional workshop on Sustainable Transport Indicators aims to bring together stakeholders from the ASEAN Member States (AMS) working at the intersection of transport, energy, and environmental disciplines to promote greater awareness about measuring and monitoring transport sector performance.

The main objectives are to:

- Strengthen awareness on data availability in the ASEAN
- Discuss the preliminary elements and table of content of the Guidelines (KLTSP Goal ST 2.3)
- Agree on standardised templates (KLTSP Goal ST 2.3)

Target group Government officials, statistic offices, experts, industry, and other organisations working on data and indicators in the transport sector

Agenda: 3rd Regional Workshop on Sustainable Transport Indicators

Wednesday, 29 March 2017

Time	Activity	Responsible/Speaker
08:45	Registration	
09:00	Welcome remarks and opening of the workshop	Tali Trigg, GIZ
09:15	From KLTSP to guidelines – the way forward Short summary of previous workshops and the context	Julia Nagel, GIZ
09:30	Objectives and workshop programme	Julia Nagel
09:55	Data availability demonstration Assessment of existing data throughout the ASEAN	Sudhir Gota, Consultant
10:45	<i>Coffee & tea</i>	
11:15	Guidelines in other regions and other data collection initiatives	Sudhir Gota
11:45	Elements of the ASEAN guidelines on sustainable transport indicators Interactive discussion	Sudhir Gota / Julia Nagel
12:15	<i>Lunch</i>	
13:30	Summary of session on elements of the ASEAN guidelines on sustainable transport indicators	Sudhir Gota / Julia Nagel
14:00	Key element of the guidelines: standardised templates for indicators <ul style="list-style-type: none"> - Presentation of standardised template for indicators - Discussion about the structure and content of the template <p><i>This section also includes a break for coffee & tea.</i></p>	Sudhir Gota Participants
16:30	Summary of the workshop results and next steps	Sudhir Gota, Julia Nagel
16:45	Closing	Tali Trigg
